Passenger/Crew

Please tear off the Passenger/Crew Health Information section and present it to a Customs Officer on arrival in Australia

Information sought on this form is required to administer quarantine laws of Australia and its collection is authorised by legislation. It will be disclosed only to agencies administering these areas and those entitled to receive it under Australian law. The leaflet 'Safeguarding Your Personal Information' is available if required.

**HEALTH ALERT NOTICE for international
travellers arriving in Australia.
Please keep this brochure for
14 days after arrival.**

TO THE TRAVELLER:

After any international travel we urge you to monitor your health. There is a small chance that during your travels you could have been exposed to infectious diseases such as influenza, Severe Acute Respiratory Syndrome (SARS), gastroenteritis or malaria. It is very important that if you become unwell in the weeks following your travel that you and your doctor consider your recent destinations as a possible source for your illness.

In particular, if you become ill with fever, chills, cough, shortness of breath, sore throat, headache or muscle aches and pains in the next two weeks, telephone a doctor or hospital immediately and tell them about your symptoms and recent travel. Please ask the staff to arrange for you to wear a surgical mask when attending the facility and provide this information sheet to the doctor. Wearing a mask will minimise the spread of your infection to others.

If you are a health care worker you need to be especially careful about working if you have any symptoms of illness in the period after travel. If you become unwell in the next two weeks contact your employer or local public health unit for advice before attending work.

TO THE DOCTOR:

The patient presenting this information sheet may have travelled to countries where cases of influenza (either bird or human) have been identified. If, on the basis of clinical signs and symptoms, and travel history you suspect that this patient may have influenza, please contact your state/territory communicable disease authority. If required, information is available from the Australian Department of Health and Ageing home page at www.health.gov.au and follow the links.

Please complete in English
